Add variables to an RMD report R.

Learning Objectives

After completing this tutorial, you will be able to:

- Add a variable to the markdown chunk in your rmd report.

What you need

You will need a computer with internet access to complete this lesson and the data for week 6 of the course.

Download Week 6 Data (~500 MB){:data-proofer-ignore=" .btn }

```
total_area <- (800 * 7) / 2
```

There are **2800 km** of burned area according to modis.

How did we do get that variable value to print in our .Rmd output? To do this, we use the following syntax:

Where the markdown text is surrounded by ticks. Followed by the language "r" and then the variable that we want to print in our report!
